

Reveal your wasted budget with AI-powered search intelligence

AI-driven strategies for unparalleled search success and revenue optimisation.

What is AI in search?

The growth of Artificial Intelligence (AI) in search continues to shape the landscape by leveraging AI-powered algorithms that deliver more relevant and personalised search experiences to users.

By automating tasks and helping to make data-driven decisions, search marketers benefit from better targeting, ad optimization, keyword research, content creation, and overall improved campaign performance - but is it right for your search strategy?

In this guide, we'll outline how Adthena's AI driven methodology can play a pivotal role in your search success.

5 reasons why AI is important in search marketing

Enhanced data analysis

Analyse key factors such as search trends, user behaviour, and keyword performance to gain valuable intelligence for campaign optimisation

Advanced targeting and personalisation

Segment audiences more effectively by leveraging data on demographics, behaviour, and preferences

Automation and efficiency

Automate keyword research, ad creation, bid optimization, and performance tracking

Real-time decision making

Analyse data in real time and make instant decisions based on user behaviour and market trends

Predictive analytics

Leverage historical data and predictive analytics to forecast future trends, anticipate user behaviour, and make data-driven decisions

Adthena at a glance

Adthena is an award-winning search intelligence platform with a unique combination of machine learning and AI-driven technology, to help brands, marketers, and agencies dominate their search landscape.

Adthena analyses millions of search terms daily to gain insights into the auction landscape. These metrics are then optimised using a combination of supervised and unsupervised machine learning techniques which take observations from the SERP - including the number of competing ads, ad positions, components on rival pages, and features derived through statistical natural language processing.

Optimize your campaign with the power of AI and guided analytics from Adthena

- Monitor market conditions and forecast performance
- Exploit competitive gaps with unrivalled data clarity
- Uncover valuable new search terms - or ones you're missing
- Discover new insights with AI-driven segmentation

Shine some light on your competitive landscape

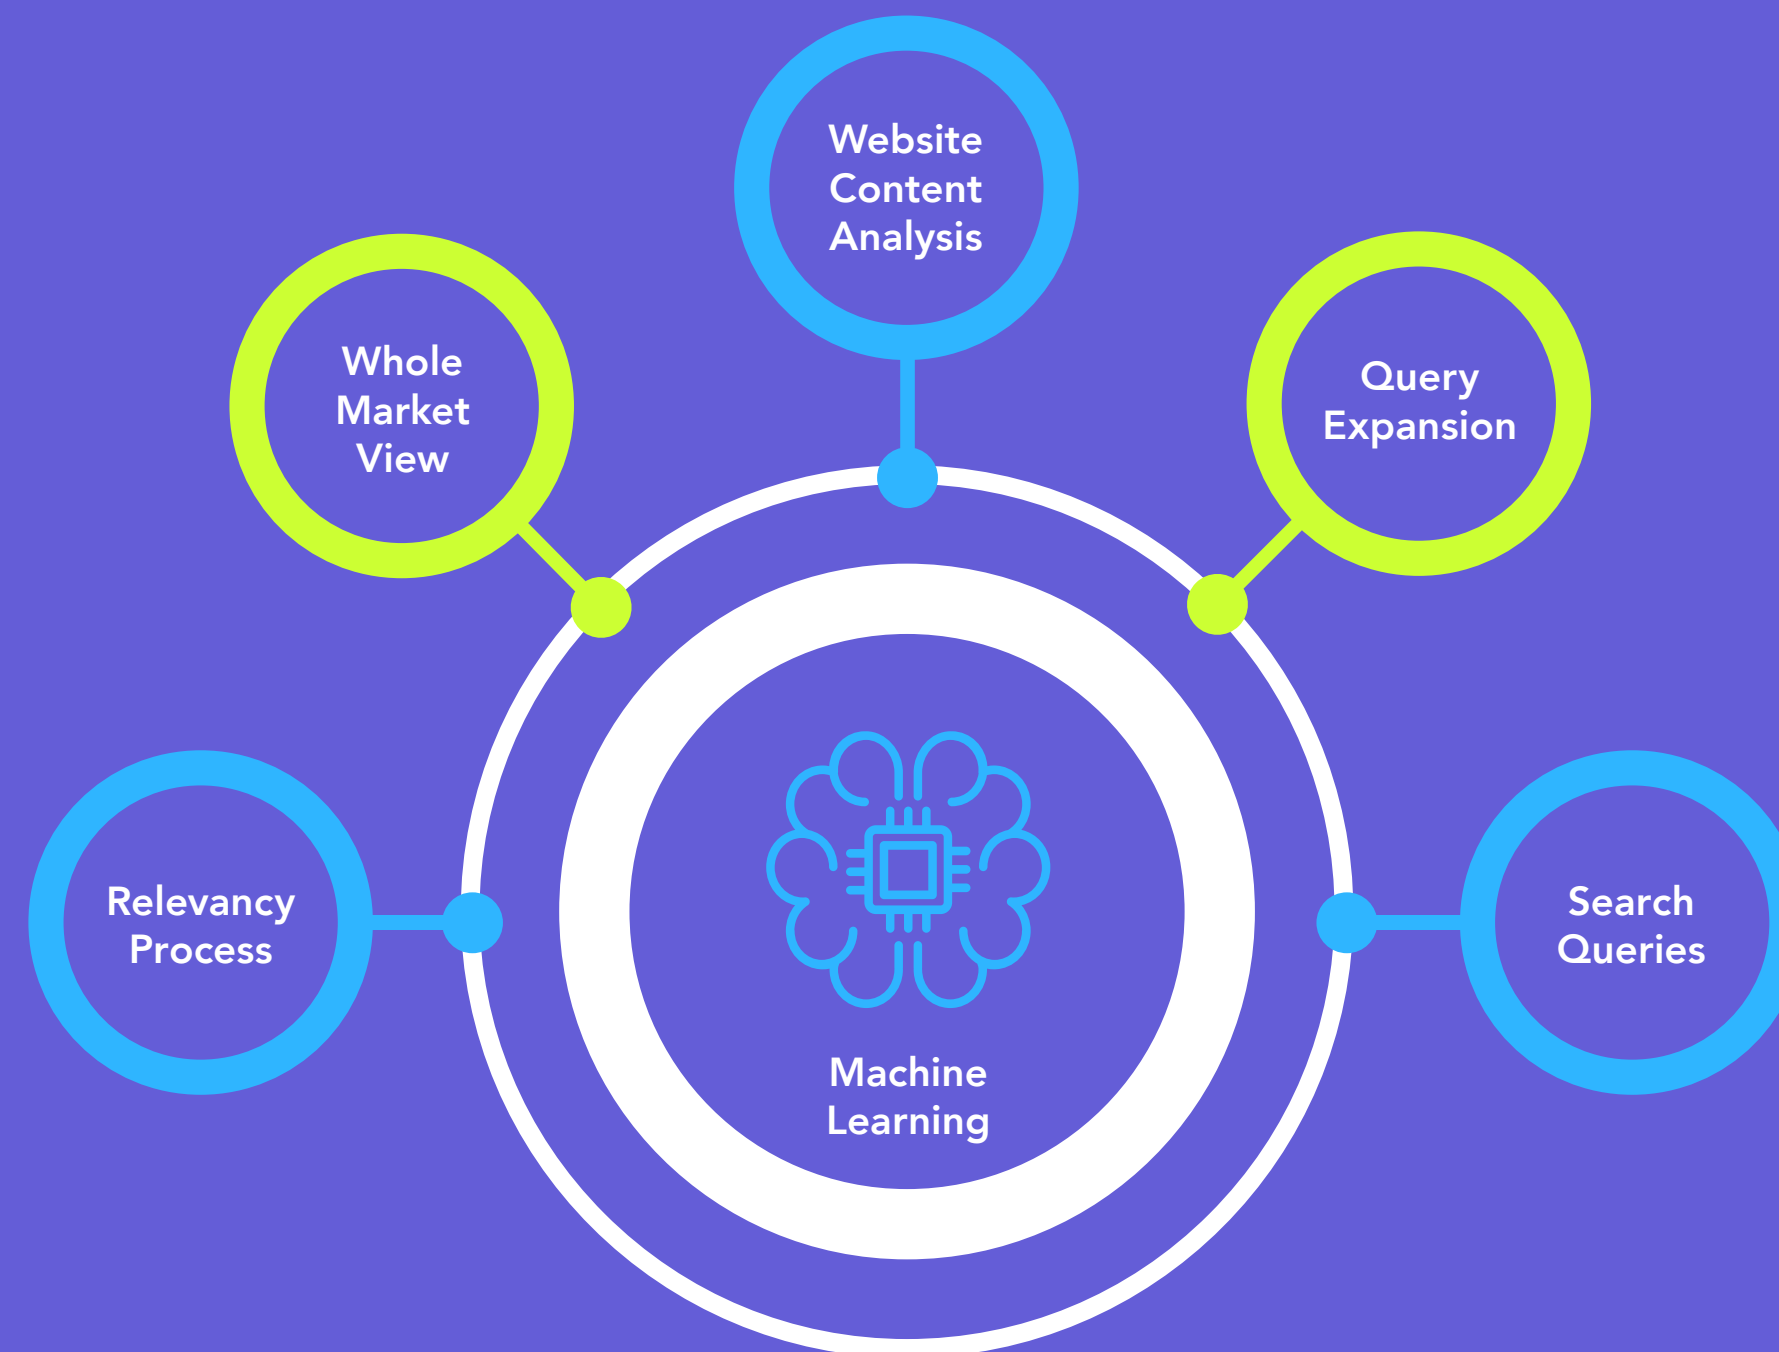

In a highly competitive blind auction, how do you see what you are doing? Our award-winning technology uses machine learning and AI, to go beyond what Google shows you.

Whole Market View will first take your keywords and competitor keywords and combine this with your search queries and your rivals search queries. This is then filtered for quality to create a unique search map that will automatically gather competitive analysis on your markets, every day, helping you to:

- Analyse your market and rivals
- Uncover risks and opportunities
- Improve ROI in search

Patented Whole Market View™

Adthena is an absolute necessity for our search team. Leaning on Adthena, we were able to track click share data accurately and timely during the launch to quickly seize opportunities when competitors were slow to respond.”

Automate and save on brand bidding

When your brand is #1 for a term in both paid and organic rankings, with no other bidder, why should you pay for those clicks? We call these "Lone Rangers".

With around-the-clock monitoring, **Brand Activator** will index your targeted brand terms to identify **Lone Rangers**. These are then automatically deactivated and added to your negative keyword list and automatically reactivated when a competitor re-enters the auction.

You can even whitelist other domains you own or your affiliates, so you're not competing against other brands that are on the same team.

Safeguard your brand with award-winning Brand Protection.

Get affiliates under control

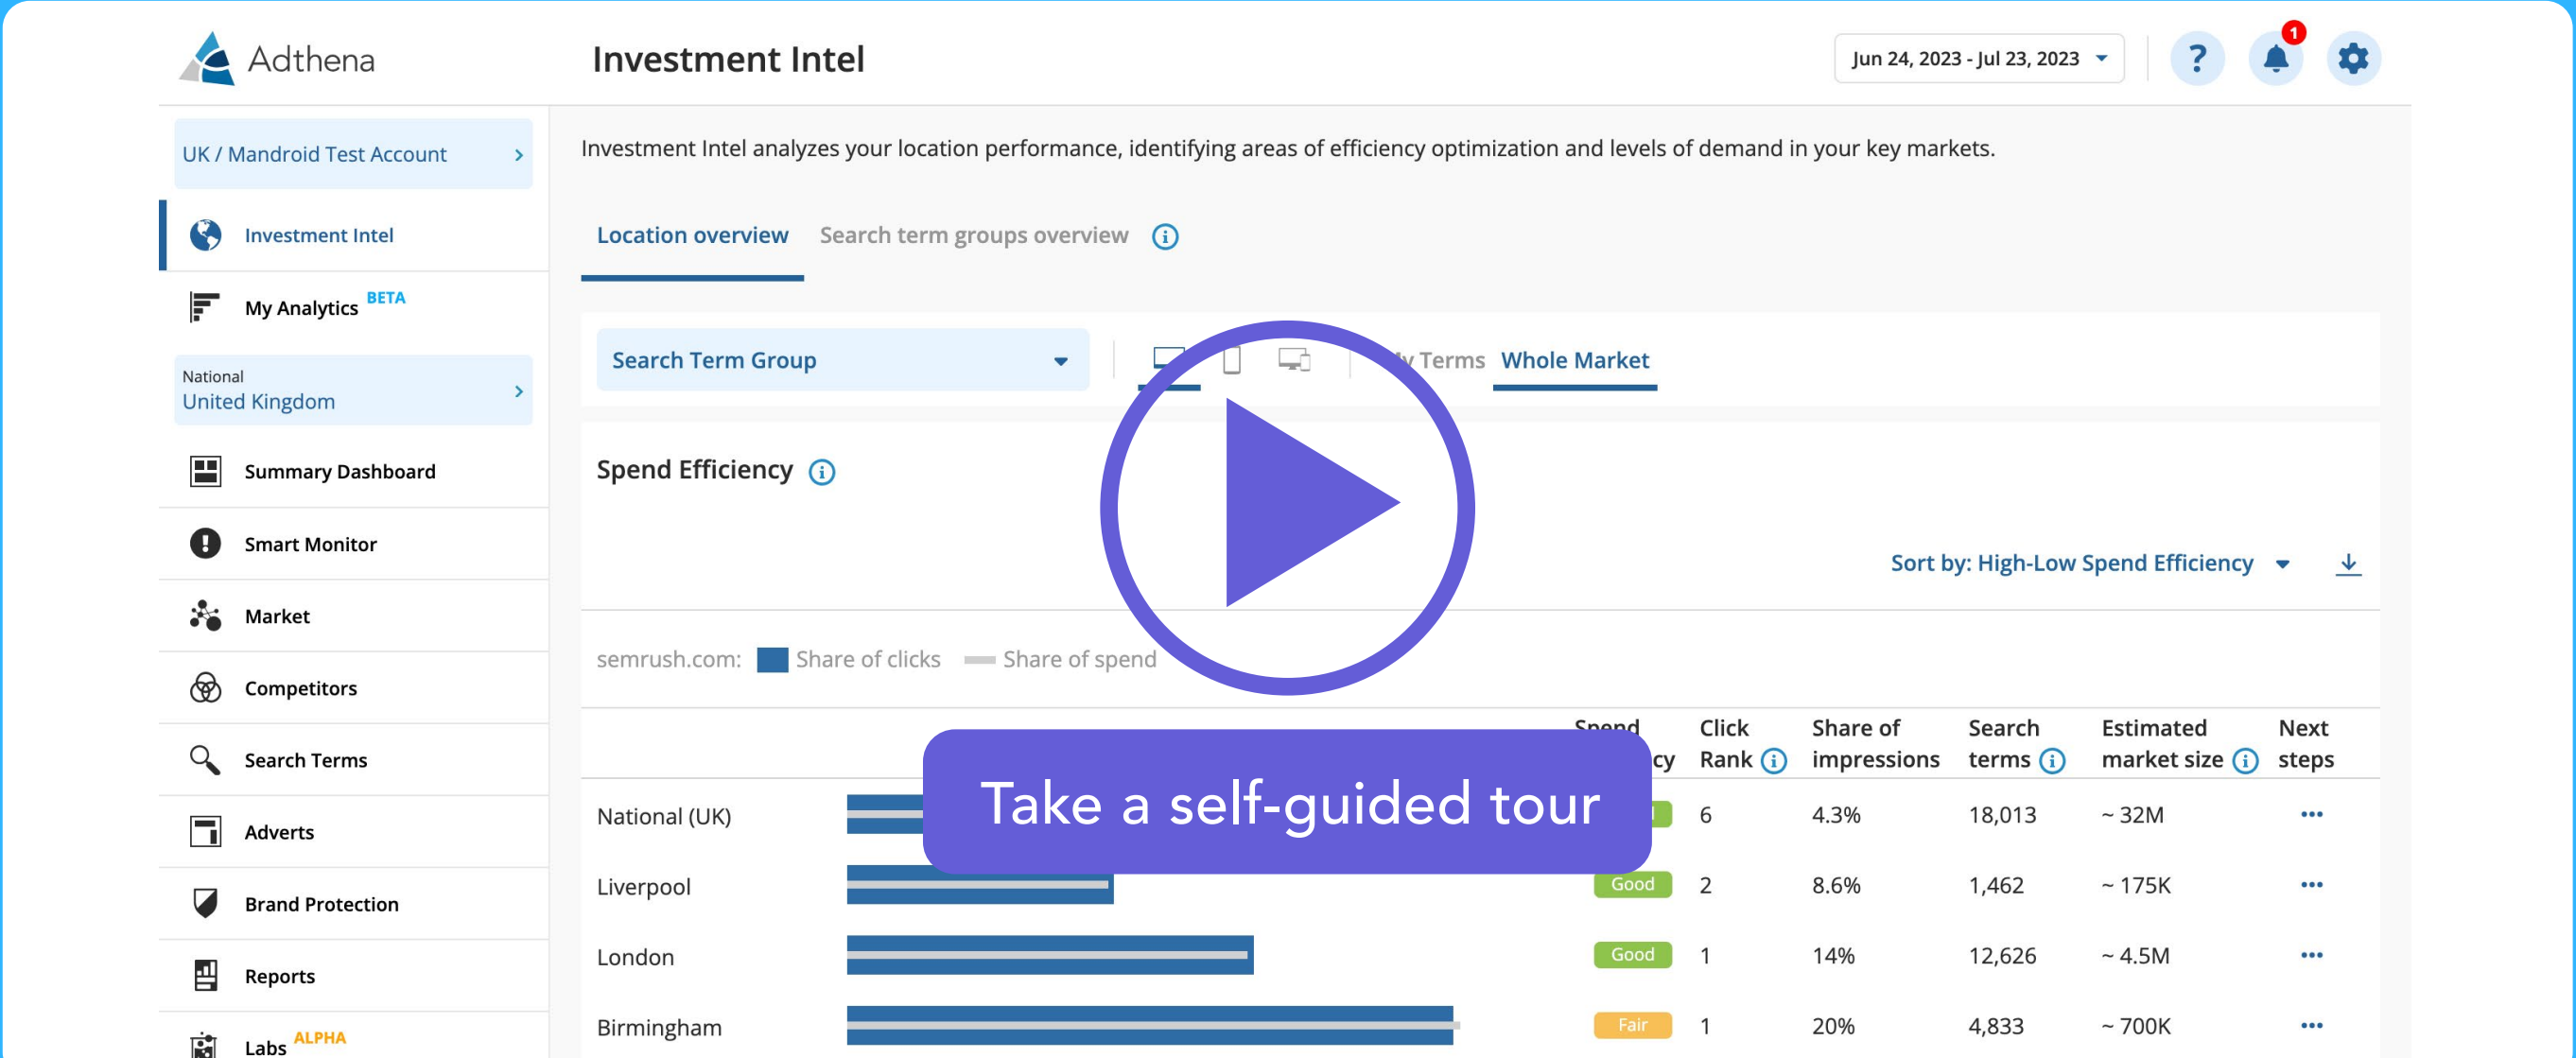

Instantly identify instances where affiliates impersonate your ads across hundreds of affiliate networks and gather compelling evidence of fraud, including ad screenshots and affiliate IDs.

Who is bidding on your brand, where are they doing it and what adverts are they using?!

Catch 10x more infringements

Losing clicks to rivals? Adthena's **Brand Protection** solution lets you continually map and monitor all competitive and partner activity around your brand terms, meaning you can efficiently respond to trademark infringements - taking them down in one click!

Dial up your Brand Protection and cut costs by **20%**

Investment Intel analyzes your location performance, identifying areas of efficiency optimization and levels of demand in your key markets.
